Professional Summary

Innovative Front-End Focused Junior Full-Stack Developer who enjoys building responsive, scalable web applications with React, TypeScript, and Supabase. I focus on creating clean, user-friendly interfaces while also implementing full-stack features like authentication, database integration, and API interactions.

I've worked on projects ranging from e-commerce platforms to digital health applications, with an emphasis on responsive design, testing, and delivering reliable user experiences. I'm comfortable collaborating in agile teams and continuously improving my skills. Currently, I'm strengthening my Node.js and Express knowledge to take on more complete full-stack challenges.

Work Experience

Junior Full Stack Dev (Front-End Focused)
TechWave Solutions · 03/2024 – 05/2025

- Built and maintained a full-stack e-commerce platform using React and Supabase, supporting authentication, database operations, and real-world purchase flows.

- Developed responsive, accessible, and reusable UI components with state management and API integrations for product listings, carts, and checkout.

- Integrated backend services for user accounts, product management, and order workflows using Supabase APIs.

- Improved performance and user experience through frontend optimizations, structured queries, and bug fixes.

- Collaborated in an agile team to deliver features, perform manual testing, and ensure release quality.

Software QA Tester
Freelance · 06/2023 – 11/2023

- Tested mobile and web apps for Facebook, Instagram, WhatsApp, and Sidekick Health — a digital health platform supporting chronic care, mental wellness, and lifestyle improvement.
- Validated features across health programs including maternal care, habit tracking, and mindfulness tools.

- Performed manual testing across devices to ensure functionality, responsiveness, and accessibility.
- Logged bugs and usability issues in structured spread sheets with detailed reproduction steps.
- Uploaded screen recordings and walkthrough videos to confirm test coverage and verify issue resolution.
- Collaborated with QA leads to retest fixed issues and ensure regression stability.
- Maintained high accuracy while testing edge cases and user flows and error handling scenarios

Front-End Developer
Innovatech Solutions · 12/2022 – 05/2023

- Assisted in the development of a responsive web application using HTML, CSS, and JavaScript, enhancing mobile accessibility and increasing traffic by 10%.

- Participated in Agile sprints, contributing to the successful delivery of five key features ahead of schedule, improving project timelines by 15%.

- Integrated third-party APIs to enhance application functionality, resulting in a 12% increase in user satisfaction and engagement.

Skills & Competencies

- Skills & Competencies
- Full Stack Application Architecture
- RESTful API Design and Development
- Database Schema Design and Optimization
- Responsive Web Development
- Agile Development Methodology
- Performance Optimization Analysis
- Technical Problem Solving
- React.js, Next.js, Node.js
- PostgreSQL
- AI-Assisted Code Development

Education

Bachelor of Science in Management and Accounting
Obafemi Awolowo University, Ile-Ife
Focus: Management and Accounting
2015 – 2019
